January 1,2020

Dear Sir/Madam,

This letter is to provide you with information regarding Phillips 66's Specialty Solvent products.

The Phillips 66 Company holds itself to the highest safety and manufacturing standards and it's committed to delivering high quality products to our customers. We take this commitment seriously with well documented compliance program.

While some of our products are used in food contact applications, it is not considered as human food or animal food by the FDA, and therefore, we are not required to register our plant as a food facility by FDA. For this reason, we are not subject to Current Good manufacturing Practices (cGMPs) or the new Food Safety Modernization Act (FSMA).

It is the user's sole responsibility to determine whether the product is suitable for use in the user's application, and whether technical, legal and regulatory requirements are met by the user. If you have questions or need additional information, please feel free to contact me directly.

Sincerely,

Lu Yu, PhD, DABT
