

Specialty Solvents

QUALITY PROGRAM

Phillips 66 Specialty Solvents is proud of the quality system that we maintain.

- Our manufacturing facilities use Total Productive Maintenance (TPM) to ensure the reliability of operations and continued improvement.
- Our facilities follow a state-of-the-art Management of Change (MOC) system.
- Training and procedures documentation are maintained online.
- Processes and procedures are audited.
- Technicians, operators and maintenance personnel are certified on a recurring cycle.
- Our laboratories maintain a Statistical Process Control (SPC) program.
- Testing data are tracked in a Laboratory Information Management System (LIMS).
 - Intermediate streams are checked for compliance with our specifications.
 - Finished products are checked for compliance with our specifications.
 - Off-spec material is flagged to ensure quality product for our customers.
- Each Certificate of Analysis (COA) is tracked electronically.

Phillips 66 Specialty Solvents assures you that the product received at your facility is of the highest quality possible and meets all agreed to specification requirements.
